## INTRODUCTION

This report is intended for use by line managers and HR professionals. It contains a range of information which is useful to support selection decisions.

It shows:

1. How Ms Candidate prefers to work (for example whether she likes following rules or is prepared to break them).
2. How Ms Candidate is likely to interact with her colleagues in a team.
3. Her likely performance against a range of competencies proven to be important at work (e.g. Leading and Supervising).

## USING THIS REPORT

This report is based on Ms Candidate's responses to the **Occupational Personality Questionnaire (OPQ)**. Her responses have been compared against those of a large relevant comparison group to give a description of Ms Candidate's preferred approach to work.

The responses Ms Candidate gave show the way she sees her own behaviour, rather than how another person might describe her. This report describes preferred ways of behaving, rather than actual skills levels. The accuracy of this report depends on the frankness with which she answered the questions as well as her self-awareness. Nevertheless, this report provides important indicators of Ms Candidate's style at work. This report links the information from the personality questionnaire to the twenty universal competencies.

This report has a shelf-life of 18-24 months and should be treated confidentially. If there are major changes in her life or work she should complete the OPQ again.

If you require support in interpreting this report, please contact a person in your organisation who has received full training in the use of the OPQ.

## ABILITY TESTS AND COMPETENCIES

The relationship between UCF competencies and ability tests is shown in the table below.

For some competencies, a number of ability tests may be relevant. However, this does not mean that all of these ability tests need to be completed. The choice of ability tests should be driven by an understanding of the **job requirements** (please consult with a qualified person within your organisation for further guidance if needed). Competency predictions are still robust if only OPQ or OPQ with one or two ability tests have been used.
